

# Grading Report

Report #1774749242404\_4d13e320-1506-4b5b-b605-7eda14816770 - 3/28/2026

## Estimated Digital Grade: F-15

### Coin Images

Obverse

Reverse

### Assessment

- Significant flatness is observed on the high points of the hair and the cheek, though the facial profile remains distinct.
- The strike is average for this issue, with strong peripheral lettering and a clearly defined date area.
- The surfaces show moderate circulation marks, but no plainly obvious deep scratches or distracting gouges were found.

- Mint luster is entirely absent, replaced by a consistent greyish-brown circulated patina.
- Eye appeal is good for the assigned grade, as the design remains bold and the rims are completely intact.
- This Estimated Digital Grade is justified because the lettering and digits remain sharp and the recessed details show more definition than is typically found in the Very Good range, despite the flatness of the high points.

## Detailed Grade Factors

**Strike:** Average - The peripheral legends and digits are well-struck, while the central high points show characteristic softness.

**Luster:** None - The surfaces have a dull, circulated appearance typical of mid-grade circulation.

**Surface Marks:** Scattered small contact marks are present; no environmental damage was detected.

**Wear Pattern:** Heavy wear is concentrated on the cheek, hair braid, and the animal's hump. The horn is nearly flat, showing only a small nub of the original detail. Rims are full and show no integration into the legends.

**Eye Appeal:** Good - The coin possesses a balanced look with no distracting damage and retains bold primary design elements.

**Key Observations:** The sharpness of the legends and the clarity of the date area are the primary factors that maintain this coin in the Fine range despite high-point flatness.

**Disclaimer:** This Estimated Digital Grade and Grading Breakdown is an AI-generated assessment based solely on user-provided images and is for educational purposes only. It does not authenticate coins, distinguish between specific manufacturing strike types (e.g., Proof, Specimen, SMS, PL business strikes, etc.) with absolute certainty, detect cleaning with absolute certainty, provide "Details" grades, or guarantee a matching grade from any physical third-party grading service. Instead of a "Details" grade, the Estimated Digital Grade could be reduced if the AI detects environmental or other damage on the coin. This could result in an Estimated Digital Grade that is lower than each of the obverse and reverse grades. Results may vary significantly from in-person grading. Digital estimates and assessments are limited by image quality and lighting. Surface cleaning, subtle luster, or other variables may not be detectable in 2D photography. Grade-EZ LLC and Grade-EZ™ are not liable for financial decisions made based on this digital estimate and condition analysis. This tool is not for use with high-value coins (\$200+).
