	22	Hellenistic Kingdoms	150	160	180	20	KINGS OF MACEDON: Alexander III 'the Great' (336-323 BCE), AR Tetradrachm, issued c. 332-326 BCE. Amphipolis, 17.00g, 26mm. Obv: Head of Herakles r., wearing lion skin. Rev: Zeus Aëtophoros seated l.; janiform head in l. field. Price 6. From the Orfew collection, ex Saint Paul Antiques Auction 2 Lot 10, 18.03.2017. Interesting control mark, some roughness. Issued under the authority of Antipater, regent in Macedon while Alexander was away on campaign. Antipater was a competent choice; among other achievements, he defeated a dangerous uprising by the Spartans under King Agis. Upon his death, he passed over his son Kassandros (Cassander) for the regency, resulting in one of the many civil wars in the empire.	8.40	171.60

From the Orfew collection, purchased from Chris Rudd; Ex J W Barratt collection, ex W Tatu collection. Fairly rough, common for the type. Cunobelin (son of Tasciovanus) was a powerful British king who held sway over much of what is now Southeastern England, and is mentioned by Suetonius. His aggression towards Roman allies, continued by his son Caratacus, ultimately led to the Roman conquest of Britain under Claudius. His legend is preserved in many literary works, most famously (via Geoffrey of Monmouth) as Cymbeline in Shakespeare's play of that name.	0.00	0.00

	104	Roman Republican and Imperial	100	150	120		Lucius Cornelius Sulla, AR denarius, issued 84-83 BCE. Asia or Greece (mint moving with Sulla), 3.45g, 19mm. Obv: L. SVLLA, Diademed head of Venus right; cupid on right, holding long palm branch Rev: IMPER ITERV, Capis and lituus between two trophies. Cr359/2; Syd 761. From the Orfew collection. Lovely iridescent toning; the ancient flan break at the top mercifully spared all important details and legend, plus the coin's weight is still within the normal range. This coin was issued as Sulla was preparing to march on Rome, setting a dangerous precedent later followed in similar circumstances by Julius Caesar. Crawford suggests the two trophies on the reverse represent those erected after Sulla's famous victory at Chaeronea, where he defeated the forces of Mithridates VI although outnumbered three to one.	8.00	142.00
	110	Roman Republican and Imperial	50	110	60		Q. Pompeius Rufus, AR denarius, issued 54 BCE. Rome, 3.83g, 18mm. Obv: Curule chair between arrow and laurel branch. Rev: Curule chair between lituus and wreath. Craw.434/2 From the Orfew collection, ex Emporium Hamburg 532 Lot 50, 18.08.2017. Quintus Pompeius Rufus was the grandson of Sulla through his daughter Cornelia Sulla. In 54 BCE, he was convicted of electoral bribery and exiled to Campania. He was tribune of the plebs in 52 and although he was Caesar's brother in law (through his sister Pompeia), he supported Pompey in the civil war. Other events in 54 BCE: Caesar's second invasion of Britain & the tragic deaths of his mother Aurelia and daughter Julia, the latter marking the end of Caesar's alliance with Pompey; the disastrous ambush of the Eburones on Cotta and Sabinus; Crassus's fateful invasion of Parthia; birth of Seneca the Elder.	6.40	103.60

Crawford 494/42a; Sydenham 1093 From the Orfew collection, acquired from Ancient Numismatic Enterprises 08.08.2018. Beautifully toned. Rome's great sewer system was a unique feat of engineering and responsible for greatly improving the health of Rome's urban population. The main drain into the Tiber, the Cloaca Maxima, was probably constructed by the Etruscan kings, and the goddess to whom this shrine was initially dedicated, Cloacina, may well have been Etruscan; only later was an association made with Venus. This type is our only source for the shrine's details, although its foundation remains in the forum. Amazingly enough, the Cloaca Maxima is still in use!	5.80	89.20

From the Orfew collection; Ex: Frank Robinson 15.09.2015 Estimate: 700 If you are in the market for a nice but "affordable" Caesar portrait, it would be hard to do better than this coin. While the reverse is weak, the portrait is of very nice style on an appealing anepigraphic design. It is very recognizably Caesar, affected only by honest wear, and quite scarce to boot. Part of 'A Twelve Caesars Silver Set with Character,' assembled by Orfew. The consignor would be very pleased if the set remained together, thus we are offering a 15% discount if a single bidder wins all of the coins (designated 'Part of a Twelve Caesars Silver Set with Character' in their descriptions: lots 119, 123, 128, 133, 137, 138, 140, 141, 142, 144, 146, & 147.) The Quidenham hoard of 22 denarii and 25 silver Icenii units was buried in 61 CE, the year of Boudicca's revolt, and almost certainly because of it. Most Boudicca revolt coins are in museums, but this hoard was sold (extremely quickly!) through Chris Rudd in 2018. If you did not obtain one from the original sale, now is your opportunity, probably a unique one: none of the coins from the previous (larger) Scole hoard have returned to the market, and this may well be the last chance to obtain a direct numismatic link to Boudicca's revolt for many years.</p> <p>The hoard was described in The British Numismatic Journal 86, 2016, p. 250 as well as in last year's Numismatic News (bit.ly/quidnn), which mentions the three Tribute pennies found, including this one.</p> <p>Part of 'A Twelve Caesars Silver Set with Character': see lot 119 for details (there is a 15% discount if a single bidder wins the entire set).</p>	12.40	247.60

Forum identified this coin as "Mars walking right, transverse spear in right hand, shield or trophy in left hand," but we feel this is an error (the globe is quite clear, and the orientation of the figure exactly matches the type usually found with the SAECVLI FELICI(TA) legend). The closest match in RIC is 433, with Mars holding globe and spear and a different obverse legend (lacking "P F"). Forum notes "The type must have been struck during a very short period after the mintmark was changed from S - C / C to S - P / C but before the reverse legends were changed to the plural ending AVGGG." We feel a stronger possibility, given the similarity to a rare antoninianus of Allectus (RIC 122, the only difference being "ALLECTVS" for "CARAVSIVS"), is that this coin was among the last struck before (or at the time of!) Carausius's assassination in 293.</p> <p>In any case, a very important coin for the Carausius specialist.</p>	5.00	70.00

Henry seized Brittany in 1166 and betrothed the former Duke's six year old daughter to Geoffrey (they were married in 1181). Young Geoffrey did not demonstrate much gratitude, however. He joined rebellions against his father twice, and was best friends with the son of Henry's enemy, Louis VII of France. Geoffrey died young, probably in a jousting accident. Presumably Henry had mixed feelings about this!</p>	18.00	382.00

In particular, he defeated his English rivals and stripped John of most of his French territory following the Battle of Bouvines in 1214. Thereafter the French crown held a pre-eminent position in Europe. Philip then added insult to injury by helping to foment rebellion in England, eventually resulting in John's forced signing of the Magna Carta. It is hard to underestimate Philip II's historical importance. You definitely need a coin of his! :)</p>	3.20	32.80

The year before this coin was issued, Charles gave his uncles the boot, brought back Charles V's advisors, and thereby much improved the situation. It was at this time that he earned the epithet "Le Bien Aimé" (The Well Liked). Less than three years later he would suffer his first bout of serious mental illness, killing four knights and nearly his own brother as well. Such incidents increased in frequency over the following years (he once insisted he was made of glass) and near the end of his reign he disinherited his own son and left the kingdom to Henry V of England. Henry and his son Otto the Great were responsible for establishing the medieval kingdom of Germany, and Quedlinburg became one of the power centres of the dynasty and, for centuries, the Holy Roman Empire. This is reflected in the Abbey's right to mint coins such as this one. Women from aristocratic families would reside there before marriage, or remain there to pursue a quiet life of devotion or scholarship. The residents could retain a great measure of independence due to the abbey's wealth and official Imperial status, and the Abbess was officially subject only to the Pope's authority. She also had a seat on the Imperial Diet and was often an important player in medieval German politics. After WWII an American soldier stole a number of medieval artifacts from the treasury, which reappeared in the 90s and were returned to the Abbey after a sensational lawsuit. The abbey is now a UNESCO World Heritage site.</p>	8.00	172.00

He was merciful to towns that surrendered without a fight, and stunningly vengeful towards rebels (e.g. Isfahan, where he massacred over 100,000 and built towers from their heads). It's estimated that 17 million people perished in his conquests, yet he is also remembered as a great patron of the arts and sciences.</p> <p>This coin was minted during Timur's push west into Kurdish territory; the Kurdish emir of Bidlis surrendered to him in 1394. This was also the period of Timur's conflict with the Golden Horde in the Caucasus and further north. On the coin, Timur represents himself as a mere Amir (general) under the Chagatai khan Mahmud, but Mahmud was a puppet ruler. As Timur was not a descendant of Genghis Khan, he couldn't claim the title for himself.</p>	5.20	74.80
