

**Washington Quarters  
Reverse Design Varieties (RDV)  
From A to H, and Beyond**

**Presented by  
José Miguel Gallego  
Heartland Coin Club**

**California State Numismatic Association, CSNA  
48th Annual Northern California Educational Symposium  
Van Nuys, CA  
April 23, 2016 (Draft Rev. 11-03-2016)**

# Before we begin...

- **Thanks!**

- I would like to thank Dr. James Wiles whose 2013 presentation, “*Washington Quarter Reverse Design Varieties*” sparked my interest in these quarters and for his support in the preparation of today’s presentation as well for answering ALL my questions.
- I will also like to thank is Herbert “Herb” Hicks, whose original article “*The Washington Quarter Reverse: A Die-Variety Bonanza*” published in February 1986 issue of *The Numismatist* first report the existence of these RDVs in Quarters. I also want to thank him for his support, guidance and providing access to his collection of RDV quarters.
- To my friends Ginny Bourke for inviting and encouraging me to do this presentation today and
- John Weiss configuring the “*Washington Quarters Reverse Design Varieties Set*” case display.
- And to my friends at the Heartland Coin Club for their support and encouragement (and patience!).

- **What you should have:**

- A printed copy of this presentation and
- And a printed copy of the “*Washington Quarters Reverse Design Varieties (RDV) Cheat Sheet*” brochure, very important. **Updates available at [HeartlandCoinClub.com/WashingtonQuarters.html](http://HeartlandCoinClub.com/WashingtonQuarters.html)**
  - Let’s quickly review this brochure since you will be using, hopefully extensively after today:
    - It includes a photo for each RDV and initial pickup points or point of interests. (This presentation includes these pickup points and other confirmation points.)
    - On the back, the table shows the RDVs with colored boxes showing the RDVs to look for.
    - And at the end, a set of flow charts that will guide in identifying the RDV by a series of questions.

- **BIGGEST TIP I CAN OFFER:**

- Start collecting your own Reverse RDV Set with one of each of common varieties, why?

# Objectives

- To learn the devices on the reverse of the Washington quarter.
- To learn about the Washington quarters reverse design varieties.
- To quickly identify each variety.
- To identify which varieties are common.
- To identify which varieties are rare.
- To learn about the three naming protocols.
- To encourage more coin collectors to collect Washington quarter RDVs.

## **Due to time constraints, it is not part of this presentation:**

- How to grade them, they will be graded as a regular Quarter but must attributed as RDV and type.
- What they are worth, although an estimated value will be presented.
- History or theorize how the Mint decided to make this changes.
- Go into the details of the different dies used in the making of these varieties.
- We will very briefly look at the RDV-009 through RDV-014 (1972-1998) and RDV-015 and on (1999-2016).

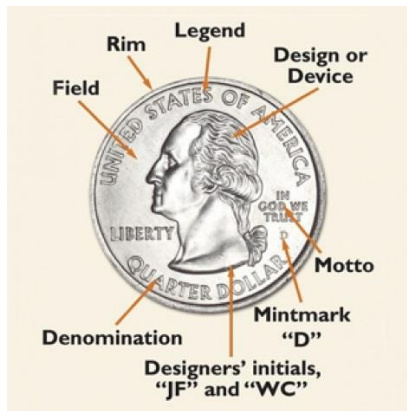

# Definitions:

**Transitional Reverses:** A transitional design variety by definition for the Wexler Die Variety Files is a working die on which the design for a given year was used the year before it was actually meant to be used, or on a working die during a year after it was removed from use. Subtle differences in design details can differentiate dies used in different years. Whether accidental or purposeful, obverse dies are sometimes mated with a reverse die meant for a previous or subsequent year.

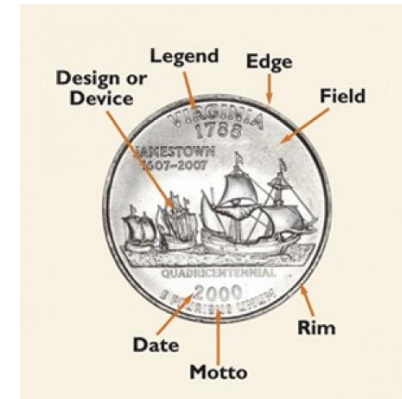

**Reverse Die Variety:** Cover only changes on the reverse side of coinage series. Just about every contemporary coinage series have a variation of their reverse design. Sometimes the changes are so insignificant that people do not notice and in some cases, they are quite noticeable. Many reverse design varieties examples exist, in coinage such as Lincoln Cents, Washington Quarters and Kennedy Half series, just to mention a few.

## Parts of a Coin

**Obverse,** or “heads” side of a 2000-D Statehood quarter. The obverse side, depicting the portrait or bust design, in this case, of President George Washington.

**Reverse,** or “tails” side, of a 2000-D Statehood quarter. This a good example of the design on reverse changes, while obverse remains unchanged.

**Edge:** the very outer side of the coin. Because the edge can be treated in many ways, it is often referred as the coin’s third side.

**Relief:** the part of the coin’s design which is raised above the coin surface or field. Coins can be struck in many degrees of relief from low relief circulation coins all the way to ultra-high relief collector’s coins.

**Weight and Fineness:** The weight, metal content, and purity of a precious metal coin.

# A Quick Look at the Reverse Devices on the Washington Quarter:

1. The quality of the relief design in general and business vs. proof strike.
2. Spacing and serif location of the "E" and "S" in USA.
3. The quality of EPU.
4. Leg of "N" in EPU, short or long.
5. Serif on N in EPU.
6. M in EPU brackets with IB?
7. Feather on the back of the head of the Eagle.
8. Primary wing feathers, the quality, and shape.
9. Secondary wing feathers, the quality, and shape.
10. The shape of the wings tip.
11. Far left leaf next to the arrow tips, shape, and position.
12. Leaf next to the arrow tips, shape, and position.
13. Characteristics of the arrow tips.
14. Leaf below the arrowheads, shape, and position.
15. Arrow's ribbon or barb wire (as an X), is it complete?
16. The quality of the arrows feathers.
17. The quality of the tail feathers (rectrices).
18. Leaves below tail feathers, shape, and position.
19. General description of the Viewer's left branch.
20. General description of the Viewer's right branch.
21. The condition of the "Q" in QUARTER, doubled?
22. "U" in Quarter touched by leaf above it?
23. Characteristics of the leaf above the "A" of DOLLAR.
24. The condition of Rim.

**Reverse Die Variety**

**RDV-001, Type A, I**

Normal business strike rim.</li> </ol> | <p>Issued from 1932 through 1964 as business strikes and the 1936 proof strikes.</p> <p><b>All above common</b></p> |  |

**Identifiers****Years to look**

1. Proof-like reverse, the eagle has greater detail, high relief, and a slight coin rotation.
2. *"ES" separated with "S" and "E" serifs leveled\*.*
3. EPU is of Proof quality of lettering.
4. Short leg "N" (*notice the width of the slanted bar in "N"*)
5. *No serif on N\**
6. *"M" is bracket the "IB"\**.
7. Eagle has a feather on the back of the head.
8. High relief left primary wing feathers.
9. Medium secondary wing feathers, separation of feathers not well-defined.
10. *Sharp, pointed left wing tip\*.*
11. Far left leaf has a very sharp tip, below the bud.
12. *Pointed (nipple) leaf above arrow tips, slightly leaned to the left and high relief\*.*
13. Arrow tips are rounded. The top arrow tips touching the leaf.
14. "Spoon" leaf behind and below arrowhead, almost touching arrow's shaft.
15. Fully visible arrow's ribbon (as an X).
16. Sharp arrow feathers.
17. Medium relief tail feathers.
18. Two leaves are touching the tail feathers, the third looks cut off.
19. Leaves on the left branch are well-defined; leaves on top of the left wing may have weak leaf tips.
20. Leaves on the right branch are well-defined; leaves on top of the right wing may have weak leaf tips.
25. "Q" in QUARTER is normal, no doubling.
21. "U" in Quarter is touched by the top leaf.
22. *Very strong and connected leaf above the A of DOLLAR.*
23. Normal Business Strike Rim.

One additional pickup point is the branch on top of the "T" in QUARTER, is larger and runs parallel to the top of the "T"\*

Issued as proof strikes from 1937 through 1942 and from 1950 through 1964.

**All above relatively common**

Issued as business strikes from 1956 through 1964.

**Not common:**  
1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963 and 1964.

## Reverse Die Variety

## RDV-003, Type C, *Illo*

| Identifiers   | Years to look   |   |
|---|---|---|
| <ol style="list-style-type: none"> <li>1. <i>Devices are strengthened, overall medium relief and low profile, "flat" looking.</i></li> <li>2. "ES" close with "S" serif higher than the "E" serif.</li> <li>3. EPU is thick and flat.</li> <li>4. Short leg "N"</li> <li>5. <i>Serif on N of UNUM*.</i></li> <li>6. M does not bracket with IB.</li> <li>7. Eagle has a feather on the back of the head.</li> <li>8. <i>Strengthened primary wings feathers. Stronger lower edge of the left wing*.</i></li> <li>9. Strengthened secondary wings feathers.</li> <li>10. Right and left wing tips are well-defined, round, do not fade into the field.</li> <li>11. Far left leaf well-defined, pointed, wide, slightly below the bud.</li> <li>12. Sharp, pointed, well-defined leaf below arrow tips.</li> <li>13. Sharp arrows tips arrows separated from the leaf.</li> <li>14. Sharp-leaf behind, below and away from arrowhead.</li> <li>15. Fully visible arrow's ribbon (as an X).</li> <li>16. Sharp arrow feathers.</li> <li>17. <i>Very sharp, strong and raised tail feathers, more "square and raised", and a very distinct centerline on each feather*.</i></li> <li>18. <i>Leaves and tail look "flat". All three leaves have quite pointed tips and barely touching the tail feathers*.</i></li> <li>19. All leaves on the left branch are well-defined with strong leaf tips.</li> <li>20. All leaves on the right branch are well-defined with strong leaf tips.</li> <li>21. "Q" in QUARTER is normal, no doubling.</li> <li>22. <i>"U" in Quarter is not touched by the top leaf*.</i></li> <li>23. <i>Sharp-leaf above the "A" of DOLLAR. Tip of the leaf is on the left side of the "A" and touching it*.</i></li> <li>24. Normal Business Strike Rim</li> </ol> | <p>Issued from 1964-D-1967 as business strikes.</p> <p><b>All above common</b></p> <p><b>Not common:</b> 1964-D, 1965 (Business Strike) and 1967 (Business Strike) are scarce to rare.</p> <p><b>Unconfirmed:</b> 1965 SMS<br/>1966<br/>1966 SMS and<br/>1967 SMS.</p> <p><b>Note:</b><br/>The first clad version has EPU in thick low relief letters. However, due to silver blanks, it shows up strongly on 1964 D C.</p> |    |

# Reverse Die Variety

RDV-004, Type D, III<sub>a1</sub>

| Identifiers  | Years to look  |   |
|--|--|---|
| <ol style="list-style-type: none"> <li>1. Devices overall medium relief and low profile, "flat" looking.</li> <li>2. "ES" close, \]</li> <li>3. \ with "S" serif higher than the "E" serif.</li> <li>4. <i>EPU is in higher relief and thinner*.</i></li> <li>5. <i>No serif on N of UNUM*.</i></li> <li>6. <i>Straight leg on "N"*</i></li> <li>7. M does not bracket with IB.</li> <li>8. Eagle has a feather on the back of the head.</li> <li>9. <i>Medium strength of the left primary wings feathers. Weaker and some with an incuse outline on the inner feathers of the right primary wing*.</i></li> <li>10. Strengthened secondary wings feathers.</li> <li>11. Right and left wing tips are well-defined, round, do not fade into the field.</li> <li>12. <i>Far left leaf weak, pointed, widest, slightly below the bud*.</i></li> <li>13. <i>Pointed-leaf and below arrow tips*.</i></li> <li>14. <i>Sharp arrow tips, arrows separated from the leaf*.</i></li> <li>15. <i>Very sharp-leaf behind, below and away from arrowhead*.</i></li> <li>16. Fully visible arrow's ribbon (as an X).</li> <li>17. Sharp arrow feathers.</li> <li>18. <i>Very sharp, strong and raised tail feathers, more "square and raised", and a very distinct centerline on each feather*.</i></li> <li>19. <i>Leaves and tail look "flat". All three leaves have quite pointed tips and barely touching the tail feathers*.</i></li> <li>20. All leaves on the left branch are well-defined with strong leaf tips.</li> <li>21. All leaves on the right branch are well-defined with strong leaf tips.</li> <li>22. "Q" in QUARTER is normal, no doubling.</li> <li>23. "U" in Quarter is barely touched by the top leaf on BS. Not touched on SMS.</li> <li>24. The "A" of DOLLAR is not touched by the leaf, the leaf is leveled to the left and leveled with the tip of "A"</li> <li>25. Normal Business Strike Rim</li> </ol> | <p>Issued from 1965-1969D as business strikes.</p> <p><b>Common for</b><br/>1966 thru 1968 business strikes.</p> <p><b>Not common:</b><br/>1969D is rare.</p> <p><b>Note:</b><br/>RDV-004 and 5 are very similar to each other and very common on the 1965 - 1967 issues and up to 1969 D. EPU appears thinner and in higher relief. The lower edge of the left wing has a very faint edge against the field. You might say it was feathered in.</p> |    |

# Reverse Die Variety

RDV-005, Type E, III<sub>a2</sub>

| Identifiers  | Years to look   |   |
|--|---|---|
| <ol style="list-style-type: none"> <li>1. Medium relief.</li> <li>2. "S" serif is higher than the "E" serif.</li> <li>3. <i>EPU is in higher relief and thinner*.</i></li> <li>4. <i>Short leg on the N*.</i></li> <li>5. <i>No serif on N of UNUM*.</i></li> <li>6. M does not bracket with IB.</li> <li>7. <i>Eagle has almost no feather on the back of the head*.</i></li> <li>8. Medium strength of the left primary wings feathers.</li> <li>9. <i>Medium strength of the left secondary wing. Inside feathers of the right secondary wings feathers are faint and some with an incuse outline on top and weak at the bottom*.</i></li> <li>10. Right and left wing tips are well-defined, round, do not fade into the field.</li> <li>11. <i>Far left leaf weak, pointed, narrowest, slightly below the bud*.</i></li> <li>12. Left leaf is rounder and closer to the arrowheads than RDV-004.</li> <li>13. <i>Rounded arrow tips, the top arrow tip slightly smaller. The top arrow tips apart from the leaf*.</i></li> <li>14. Pointed-leaf behind below and closer to arrowhead than RDV-004.</li> <li>15. Fully visible arrow's ribbon (as an X).</li> <li>16. Sharp arrow feathers. A large gap between arrow feathers and on the back leaf.</li> <li>17. Very sharp, strong and raised tail feathers and nicely separated with a round finish.</li> <li>18. <i>All three leaves have quite pointed tips, first and second barely touching the tail feathers, the third one is not touching them*.</i></li> <li>19. All leaves on the left branch are well-defined with strong leaf tips.</li> <li>20. All leaves on the right branch are well-defined with strong leaf tips. Leaf above right the branch is barely visible.</li> <li>21. <i>"Q" in QUARTER is normal, no doubling*.</i></li> <li>22. Leaf far from "U".</li> <li>23. The "A" of DOLLAR is not touched by the leaf.</li> <li>24. Normal Business Strike Rim</li> </ol> | <p>Issued from 1965-1968 and in 1969D as business strikes. As Proof in 1968S.</p> <p><b>Common for:</b><br/>1965 thru 1968 business strikes and special mint strikes. Common for 1968D and 1969D business strikes.</p> <p><b>Not common:</b><br/>1968S (proof) which are extremely rare.</p> <p><b>Notes:</b><br/>RDV-004 and 5 are very similar to each other and very common on the 1965 - 1967 issues and up to 1969 D. The lower edge of the left wing has a very faint edge against the field.</p> |    |

# Reverse Die Variety

RDV-006, Type F, III<sub>b</sub>

| Identifiers  | Years to look  |   |
|--|--|---|
| <ol style="list-style-type: none"> <li>1. <i>Medium relief. Rather sharp relief*.</i></li> <li>2. <i>"S" serif higher than the "E" serif.</i></li> <li>3. <i>EPU similar to Type C, III<sub>o</sub>, but a bit higher in relief*.</i></li> <li>4. <i>Straight (long) leg on the N*.</i></li> <li>5. <i>Serif on N of UNUM*.</i></li> <li>6. M does not bracket with IB.</li> <li>7. <i>Almost no feather on the back of the head*.</i></li> <li>8. The inside of the left primary wing sharper than Type C, III<sub>o</sub>, and has a stronger lower edge of the left wing like Type C.</li> <li>9. Secondary wings are sharp and defined.</li> <li>10. Right and left wing tips are well-defined, right wing tip it is quite rounded.</li> <li>11. <i>Far left leaf shorter than others, leveled with the bud*.</i></li> <li>12. <i>Left leaf with shows a clear vertical and tighter pointed tip and doubling*.</i></li> <li>13. <i>Rounded arrow tips, same length. The top arrow tips closer to leaf*.</i></li> <li>14. Pointed-leaf behind below is closer to arrowhead than RDV-005.</li> <li>15. Fully visible arrow's ribbon (as an X).</li> <li>16. Sharp arrow feathers but feather tips are not sharp. There is a medium gap between the back leaf.</li> <li>17. Very sharp, strong and raised tail feathers. Feathers are separated with a round finish.</li> <li>18. <i>All three leaves have quite pointed tips, first and second barely touching the tail feathers, the third one is not touching them*.</i></li> <li>19. All leaves on the left branch are well-defined with strong leaf tips.</li> <li>20. All leaves on the right branch are well-defined with strong leaf tips. Leaf above right the branch stem is well-defined.</li> <li>21. <i>Master doubling on lower leaves and Q of QUARTER most noticeable on the inside edge of the top of the Q*.</i></li> <li>22. "U" in Quarter is just touched by top leaf.</li> <li>23. The leaf on top of the "A" of DOLLAR is above and in front of it.</li> <li>24. Normal Business Strike Rim</li> </ol> | <p>Issued from 1967-1972D as business strikes.</p> <p><b>Common for</b><br/>1968, 1968D, 1969, 1970, 1970D, 1971, 1971D, 1972, 1972D business strikes.</p> <p><b>Not common:</b><br/>1967, 1968S and 1969D.</p> <p><b>Unconfirmed:</b><br/>1967 SMS.</p> <p><b>Notes:</b><br/><b>One additional pickup point is the branch on top of the "T" in QUARTER, is wider.</b></p> |    |

# Reverse Die Variety

RDV-007, Type M or G, III<sub>m</sub>

| Identifiers   | Years to look   |  |
|---|---|--|
| <ol style="list-style-type: none"> <li>1. Medium relief</li> <li>2. "S" serif is higher than the "E" serif.</li> <li>3. <i>EPU is in higher relief and thinner*.</i></li> <li>4. <i>Straight (long) leg on the N*.</i></li> <li>5. <i>No Serif on N of UNUM*.</i></li> <li>6. M does not bracket with IB.</li> <li>7. The feather on the back of the head is larger.</li> <li>8. <i>High relief of both primary wings feathers*.</i></li> <li>9. <i>Very high relief of both secondary wings feathers. The bottom of the wings is very sharp and can be felt with fingernail*.</i></li> <li>10. Right and left wing tips are well-defined, round, do not fade into the field.</li> <li>11. <i>Far left leaf is longer than in other varieties, has been extended upwards and appears doubled, pointed and almost on the back leaf*.</i></li> <li>12. <i>Rounded leaf below arrow tips, has a spoon-like shape with doubling*.</i></li> <li>13. <i>Rounded arrow tips, same length. The top arrow tips closer to leaf*.</i></li> <li>14. Pointed-leaf behind and below arrowhead is closer to arrowhead and arrow shaft.</li> <li>15. Missing top of arrow's ribbon (as an X).</li> <li>16. Sharp arrow feathers and tips. There is a medium gap with the back of the leaf.</li> <li>17. <i>All three leaves have quite pointed tips, all touching the tail feathers*.</i></li> <li>18. Very sharp, strong and raised tail feathers. Feathers are nicely separated with a round finish.</li> <li>19. All leaves on the left branch are well-defined with strong leaf tips.</li> <li>20. All leaves on the right branch are well-defined with strong leaf tips. Leaf above right the branch stem is well-defined with strong leaf tips.</li> <li>21. <i>Master doubling on lower leaves and inside edge of the top of the Q of QUARTER*.</i></li> <li>22. "U" in Quarter is barely touched by the top leaf.</li> <li>23. Leaf not touching "A"</li> <li>24. Normal Business Strike Rim</li> </ol> | <p>Issued from 1968S thru 1970D strikes.</p> <p><b>Common for</b> 1968S proof strikes and for the 1969 and 1970D business strikes.</p> <p><b>Not common:</b> 1969D and 1970.</p> <p><b>Notes:</b> Most 1968 S and most 1970 D mint sets are type G. The type G also appears on a minority of the 1969 D and the 1970 Philly.</p> <p>Type G was made from Type F artwork, Type F does not have Serif on N of UNUM.</p> |   |

# Reverse Die Variety

RDV-008, Type H, III<sub>b</sub>

| Identifiers   | Years to look   |  |
|---|---|--|
| <ol style="list-style-type: none"> <li>1. <i>Proof-like reverse, the eagle has greater detail, high relief*.</i></li> <li>2. <i>"S" serif is leveled with the "E" serif with a gap*.</i></li> <li>3. (This article was published in the March 13, 2015 issue of *the COIN DEALER CND MONTHLY SUPPLEMENT newsletter*)

Based on trying to collect them from different sources:

- 1959 is by far the most common Type B quarter.
- 1960 and 1958 are next.
- 1957, 1963 and 1964 are pretty difficult.
- 1956, 1962, and 1961 are more difficult to get than any other. With 1956 being the hardest to find.

NGC and PCGS only started a couple years ago (and only for an additional), therefore the population of Type B unknown, therefore this is a GREAT opportunity to acquire certified but without the Type B certification.
